PUBLIC MEETINGS AND CORRESPONDENCE

Introduction

The Project Study Area for the Mid-States Corridor includes 12 counties in Southern Indiana. The public meeting process has been designed to provide a broad notification process using traditional media, social media and a project website. Multiple meetings have been held throughout the region to present the project purpose and need, preliminary and screened alternatives and other project information. Two rounds of Public Information Meetings have been held to date. ‘Meetings in a Box’ also were hosted at multiple libraries within the study area during each round of meetings. A project office was established at the onset of the public involvement process on the campus of Vincennes University in Jasper.

Public Information Meetings

The Project Team conducted a series of Public Information Meetings (PIMs) at two key project milestones. At each milestone, there were three meetings at geographically diverse locations within the project study area. Meeting notices were provided via traditional media, social media, E-blasts, text alerts and on the project website.

For each public information meeting, the following documents are provided at the end of this report:

- A summary of each meeting
- Sign-in sheets for each meeting
- A copy of the presentation made at each meeting
- A diagram showing project display stations where staff interacted with attendees

All comments received are in the project record. All comments were considered in determining the project purpose and need and alternatives. This input was considered in determining conceptual alternatives, preliminary alternatives and alternatives carried forward for detailed study.

The first round of meetings coincided with the scoping phase of the project. The Draft Purpose and Need and Conceptual Alternatives were presented for public input. Participants were encouraged to submit written comments at the meeting, via the project website email or via postal mail. The second round of meetings coincided with the Screening of Alternatives phase of the project.

The first round of public information meetings was in August 2019. Meetings were held at Washington High School, Springs Valley High School in French Lick and Jasper High School.

The second round of public information meetings was in February 2020. Meetings were held at Loogootee High School, Bedford Middle School and Jasper Middle School.

PIM Round 1

- Washington High School – August 5, 2019. In attendance were 83 members of the public and 13 members of the project team. Input was gathered from conversations with the public and 30 comment forms. Key themes were:
 - Improving regional connectivity to promote economic development in the western portions of the study area is a significant need.
 - Environmental impacts, particularly to the Hoosier National Forest, are a significant issue.
 - Project cost also is an important decision factor.
 - The project should use existing infrastructure where possible and minimize new terrain construction.
 - Improved travel safety is important to this region.
- Springs Valley High School, French Lick – August 6, 2019. In attendance were 112 members of the public and 15 members of the project team. Input was gathered from conversations with the public and 55 comment forms. Key themes were:
 - Improving access for tourism and business is important for economic development in this region.
 - Environmental impacts, particularly those which affect the region's rural landscape and Hoosier National Forest, should be minimized or avoided.
 - The project should use existing infrastructure where possible and minimize new terrain construction.
 - Potential impacts to homes, farms and other businesses are important.
 - Maintaining existing county road access is important, as is travel safety.
- Jasper High School – August 8, 2019. In attendance were 236 members of the public and 19 members of the project team. Input was gathered from conversations with the public and 111 comment forms. Key themes were:
 - Impacts to private property, particularly farms and residential areas, are important.
 - This project has the potential to significantly impact traffic flows around Jasper and Huntingburg. Congestion relief and safety improvements are needed. Impacts to small businesses due to traffic flow changes should be minimized.
 - Forest and air quality impacts should be minimized or avoided.
 - Improving regional connectivity is vital for continued economic development and improved quality of life.
 - Project cost also is an important decision factor.

PIM Round 2

- Loogootee High School – February 18, 2020. In attendance were approximately 500 members of the public and 20 members of the project team. Input was gathered from conversations with the public and 12 comment forms. Key themes were:
 - Improving regional connectivity through a more direct route to promote economic development in the Loogootee/Martin County area is a significant need.
 - Environmental impacts, particularly to the Hoosier National Forest to the east and other natural resources, are a significant issue.
 - Impacts to the people, property and way of life in the Loogootee area raise concerns.
 - The project should use existing infrastructure where possible and minimize new terrain construction.
 - Amish community could be significantly impacted and the farming community as well.
- Bedford Middle School – February 19, 2020. In attendance were 150 members of the public and 15 members of the project team. Input was gathered from conversations with the public and 31 comment forms. Key themes were:
 - The region missed the opportunity to fully capitalize on benefits of I-69. We don't want to miss this opportunity.
 - Environmental impacts, particularly those which affect the region's karst topography, water quality and Hoosier National Forest, should be minimized or avoided.
 - Route M has extremely challenging terrain. Many were concerned about impacts to the limited access that already exists. There are concerns about additional flooding.
 - Potential impacts to homes and farms, especially with Route M, are important.
 - Will additional traffic on this facility cause safety and congestion issues on SR 37/US 231?
- Jasper Middle School – February 20, 2020. In attendance were approximately 600 members of the public and 20 members of the project team. Input was gathered from conversations with the public and 112 comment forms. Key themes were:
 - Impacts to private property, particularly farms and residential areas, are important.
 - There were concerns that new roadway will adversely impact the Dubois County's major growth area near Ireland.
 - Upgrades will be needed to existing state highways used for access to a new facility.
 - There will be impacts to businesses if Huntingburg and Jasper are bypassed.
 - Improving regional connectivity is vital for continued economic development and improved quality of life in Huntingburg, Jasper and Dubois County.
 - The project should spend money to fix existing facilities rather than build a new facility.

- Over 2,600 electronic comment forms were submitted as part of the second round of PIMs. These forms are included in the project record. Their input was considered in finalizing the alternatives carried forward for detailed study.

Individuals completed electronic forms while attending meetings or at their own leisure. There were two open-ended questions on the form. The first question was, “Do you know of any natural or man-made features the Project Team should be aware of as it considers the alternatives moving forward for detailed study?” The second question was, “What other comments would you like to share with the Project Team?” This summary highlights specific resource concerns, clusters of preference or opposition to route alternatives and common resource concerns.

- Resources of Concern - Loss of farmland and a loss of homes are the two concerns stated most frequently. Other concerns included other impacts to farming operations. Many commented that existing roads should be upgraded or repaired rather than providing a new road. There were multiple requests to limit new road construction to providing only bypasses around Jasper, Huntingburg and possibly Loogootee. There is concern about negative impacts to businesses in small towns bypassed by alternatives. Hoosier National Forest is the natural resource of most concern. Other comments expressed concerns about impacts to wildlife, habitat or the environment. There also were comments expressing concern for karst features, especially the Orangeville Rise and Westly Chapel Gulf.
- Input Favoring or Opposing Specific Alternatives – This includes comments that specifically mentioned an alternative or otherwise made the route in question clear. Route O received the most direct opposition and the most direct support. 34 comments specifically opposed Route O while 29 favored Route O. Route P received the second most direct favorable feedback. Many comments favored upgrading existing US 231 without breaking new ground. These were not considered support for Route P. 293 comments opposed all routes, preferring the no build option. There were few comments naming a preferred facility type by name, and there were a significant number of comments favoring a US 231 upgrade to a divided highway.

Meetings in a Box

In addition to holding two rounds of Public Information Meetings, the Project Team identified 17 libraries across the project study area to “host” Meetings in a Box. These libraries are listed below. Meeting packets containing project handouts along with instructions on how to submit comments in provided boxes were delivered to each library. Notifications about the Meetings in a Box were made through traditional media, social media, text alerts, E-blasts and the project website. Thirty-six comments were gathered from the first round of meetings and 46 during the second round. These comments are part of the project record. They were considered in evaluating the project purpose and need and alternatives. These included the conceptual alternatives, preliminary alternatives and alternatives carried forward for detailed study.

For the Meetings in a Box, the following documents are provided at the end of this report:

- A press release announcing them, including a listing of locations where materials were available

- “Meeting in a Box” materials

Library Locations

- Bloomfield-Eastern Greene County Public Library
- Monroe County Public Library
- Bedford Public Library
- Mitchell Community Public Library
- Shoals Public Library
- Loogootee Public Library
- Washington Carnegie Public Library
- Pike County Public Library
- Pike County Public Library - Otwell Branch
- Huntingburg Public Library
- Jasper-Dubois County Public Library
- Dubois Branch Library
- Ferdinand Branch Library
- Melton Public Library
- Orleans Town and Township Public Library
- Spencer County Public Library
- Lincoln Heritage Public Library

Project Office

A project office was established on the Jasper Campus of Vincennes University (Administration Building, Room 216, 850 College Ave. Jasper, IN 47546). A July 10, 2019 press release announced the Mid-States Project Office opening on Monday July 15. Office hours were maintained 8:00am to 5:00pm (Eastern Time) on Monday, Wednesday and Friday and by appointment. The office was temporarily closed on March 23, 2020 at the end of the 30-day comment period for IM #2. This was in response to the COVID-19 pandemic. The office was reopened by appointment only on February 1, 2021.

All statistics regarding the Project Office are as of April 1, 2021. All input received is part of the project record. These items were considered in evaluating the project purpose and need and alternatives. These included the conceptual alternatives, preliminary alternatives and alternatives carried forward for detailed study.

Visitors and Phone Inquiries

- Visitors – The project office has had 83 visitors. There were two surges of visitors during the two rounds of PIMs. Visitors typically were interested in asking questions, look more closely at mapping and expressing concerns about potential impacts to property or businesses, especially farming operations.
- Phone Inquiries – The project office has received 128 phone inquiries. Questions and input have been similar in nature to what was identified under Visitors.
- Written Correspondence
 - Emails – The project team has received 272 inquiries and/or comments via email correspondence. The majority have come directly through the project website email portal. Some were sent directly to project personnel. Feedback has been consistent with other sources noted previously. This includes general opposition, property impact concerns and preferences for or opposition to specific routes.
 - Letters – The project team has received 59 letters and/or comment forms through traditional mail or as an email attachment. These include letters of support, letters of opposition and mail-in comment forms from public meetings. Letters of support have been generally in favor of the southeastern Route O or of western Routes B or C.
 - Social media – Over 250 comments were received through a project Facebook page. Most of the comments were general statements which did not require responses. The platform has been used as an engagement opportunity. The project team provided responses to comments submitted as questions or written such that additional information would be helpful.

MID-STATES CORRIDOR

Date of Meeting: August 5, 2019 **Re:** Mid-States Corridor Public Meeting Kick-off -- Washington, IN

Location: Washington High School – Washington, IN **Issue Date:** August 21, 2019

Submitted By: Lochmueller Group

In Attendance: There were 83 attendees from the public in attendance. Additionally, 13 representatives from the project team were in attendance.

Key Themes of public input—these themes represent reoccurring sentiments from conversations with the project team and comment forms received at Washington, IN.

1. Improving regional connectivity to promote economic development in the Western portions of the study area is a significant need.
2. Environmental impacts, particularly to the Hoosier National Forest, are a significant issue.
3. Project cost also is an important decision factor.
4. The project should use existing infrastructure where possible, and minimize new terrain construction.
5. Improved travel safety is important to this region.

A full meeting agenda and summary for all three public kick-off meetings can be found on the subsequent pages, following the location specific information.

Date of Meeting: August 8, 2019 **Re:** Mid-States Corridor Public Meeting Kick-off – Jasper, IN

Location: Jasper High School – Jasper, IN **Issue Date:** August 21, 2019

Submitted By: Lochmueller Group

In Attendance: There were 236 attendees from the public in attendance. Additionally, 19 representatives from the project team were in attendance.

Key Themes of public input—these themes represent reoccurring sentiments from conversations with the project team and comment forms received at Jasper, IN.

1. Impacts to private property, particularly farms and residential areas, are important.
2. This project has the potential to significantly impact traffic flows around Jasper and Huntingburg. Congestion relief and safety improvements are needed. Impacts to small businesses due to traffic flow changes should be minimized.
3. Forest and air quality impacts should be minimized or avoided.
4. Improving regional connectivity is vital for continued economic development and improved quality of life.
5. Project cost also is an important decision factor.

A full meeting agenda and summary for all three public kick-off meetings can be found on the following pages.

Public Meeting Agenda

ITEMS DISCUSSED:

The meetings were an open house format lasting from 5:30 – 7:00 pm Eastern Time. A brief project presentation was given at 6:00 pm. Before and after the presentation, the project team was available for questions at informational stations.

Project Stations

After attendees signed in at a welcome table and provided contact information for future outreach, they were encouraged to visit the stations to learn more about the project.

Public Involvement Station

At the public involvement station, attendees were given an informational handout with project details, a timeline, and a map of preliminary alternatives. The handout also included contact information to encourage attendees to follow the project progress through the website or social media outlets. In addition to a take-home handout, the attendees were given a comment form, which included a preliminary alternatives map on which they could draw or write suggestions. The attendees were asked to fill out the comment/map sheets and deposit them in a comment box before they left.

Project Overview/Study Area Station

The project overview/study area station included posters with the 12-county study area map and a brief explanation of the Mid-States Corridor. Jeff Whitaker (Lochmueller) and Clint Scherzer (INDOT) from the project team answered questions relating to the study area, as well as general project questions.

Environmental Process/Tiered Study Approach Station

The Environmental Process/Tiered Study Approach station included graphics to help explain the environmental process and the timeline for a tiered study. Rusty Yeager (Lochmueller) and Matt Riehle (Lochmueller) from the project team answered questions relating to the Environmental Impact Statement (EIS) process as required by the National Environmental Policy Act (NEPA) and questions relating to the Tiered approach and how that governs the project timeline.

Purpose and Need Station

The Purpose and Need station included a poster with a brief description outlining what the Purpose and Need section of an Environmental Impact Statement (EIS) entails. Michael Grovak (Lochmueller) from the project team explained the significance of Purpose and Need, as well as general questions relating to the overall project process.

Potential Preliminary Alternatives Station

The potential preliminary alternatives station included two large maps of the potential preliminary alternatives. On various nights, this station was staffed by different members of the project team, including Jason DuPont (Lochmueller Group), Josh Eisenhauer (VS Engineering) and Nick Jahn (VS Engineering). They explained the process of narrowing down preliminary alternatives and how each are evaluated. As part of a tiered study, the Tier 1 study will determine a 2,000-foot-wide preferred corridor in its official “Record of Decision”. This corridor will then advance to subsequent Tier 2 studies, where specific alignments will be determined.

Timeline and Project Team

The timeline and project team station included graphics explaining ‘next steps’ and the unique partnership of the project team. Mark Schroeder (RDA), Kyanna Moon (INDOT), and David Goffinet (Lochmueller) from the project team answered questions regarding public involvement and agency representation, as well as general project questions.

Presentation

Project Manager, Jason DuPont (Lochmueller Group), began the presentation with introductions of the project team, including Kyanna Moon (INDOT), Michelle Allen (Federal Highway), Mark Schroeder (Regional Development Authority), and David Goffinet (Lochmueller, Public Involvement). The presentation included:

- Project Overview – The EIS process, the evaluation of multiple facility types and multiple corridors in a 12-county study area
- The NEPA Process – The NEPA process requires federally-funded projects to conduct an environmental study which evaluates the cost, benefits, and impacts of the proposed project. The process requires extensive public and agency coordination.
- The Tiered Approach – A tiered approach is being used due to the size and complexity of this project. Tier 1 is a “big picture” evaluation which will identify a corridor/facility type which then advances to Tier 2 studies for several Sections of Independent Utility (SIUs). Tier 2 studies identify specific alignments and right-of-way requirements for each SIU.

- A project timeline and important milestones –
 - Milestone 1: Preliminary Alternatives, Purpose and Need—Fall 2019
 - Milestone 2: Screening of Alternatives—Early 2020
 - Milestone 3: Draft Environmental Impact Statement (EIS) – Fall 2020
 - Milestone 4: Final EIS & Record of Decision (ROD) – Summer 2021
- Purpose & Need – The specific regional **needs** this project aims to address. Including:
 - Improved regional connectivity for businesses in Dubois County and southern Indiana;
 - Improved regional traffic safety in Southern Indiana; and
 - Supporting economic development in southern Indiana; and
 - Improved connections to major multi-modal locations from southern Indiana
- Potential Preliminary Alternatives – The explanation of options from I-64 through Jasper and either directly North on existing 231, or East or West to connect to I-69 or SR 37. The alternatives generally follow existing highway facilities w/ some new terrain options.
- The process aims to avoid, minimize, or mitigate potential social, economic, and environmental impacts
- Environmental Considerations – The process looks at both human and environmental considerations
- The next steps for public and agency involvement, including future public meeting dates
 - Agency Coordination meeting: August 20th
 - The second round of Public Information Meetings: Early 2020

David Goffinet, Public Involvement Manager (Lochmueller Group), explained the importance of public involvement in this process, including:

- The variety of groups involved, including: Regional Issues Involvement Teams, *Ad Hoc* stakeholder meetings, working alignment meetings, and the broader public.
- Outreach Tools – The various ways the public can provide feedback, comments, or questions, including: the project website, the local project office on Vincennes University Jasper Campus Administration Building, the comment sheets provided, and various project social media outlets.

The project team remained at the venue after the presentation to answer questions.

Mid-States Corridor Public Meetings

The Mid-States Corridor Project examines the concept of an improved highway connection in southern Indiana.

The Mid-States Corridor is anticipated to begin at the William H. Natcher Bridge crossing of the Ohio River near Rockport, continue generally through the Huntingburg and Jasper area and extend north to connect to Interstate 69.

**MID-STATES
CORRIDOR**

We want to hear what you think.

Learn more about the project and share your feedback.

**Monday
August 5**

Washington High School

608 E. Walnut St.
Washington, IN

**Tuesday
August 6**

Springs Valley High School

326 S. Larry Bird Blvd.
French Lick, IN

**Thursday
August 8**

Jasper High School

1600 St. Charles St.
Jasper, IN

Public meetings are from 5:30 - 7:00 p.m. with a presentation at 6:00 p.m. by members of the Project Team.

● **Open house format, drop in when you can** ●

Can't make it? Contact the project office.

Mid-States Corridor Project Office

Open Monday, Wednesday and Friday
8 a.m. - 5 p.m. and by appointment

Vincennes University Jasper Campus

MID-STATES CORRIDOR PUBLIC INFORMATION MEETING #1

SAMPLE PIM#1

5:30 – 6:00 OPEN HOUSE
6:00 – 6:30 PRESENTATION
6:30 – 7:00 OPEN HOUSE

JASPER HIGH SCHOOL
THURSDAY, AUGUST 8TH, 2019
5:30 TO 7:00

**MID-STATES
CORRIDOR**

Introductions

- Jason DuPont- Lochmueller Group
Project Manager
- Kyanna Moon – INDOT Project Manager
- Michelle Allen – FHWA-Indiana Division
- Mark Schroeder – Mid-States Regional
Development Authority
- David Goffinet – Public Involvement

MID-STATES
CORRIDOR

Project Overview

- Tier 1 Environmental Impact Statement
- Evaluate improved highway connection (multiple facility types)
- Evaluate multiple corridors
 - Natcher Bridge to I-69 (multiple corridors west directly to I-69 and east to I-69 via SR 37)
- Twelve county study area

**MID-STATES
CORRIDOR**

What is the NEPA process?

- National Environmental Policy Act (NEPA)
- Required for federally-funded projects (future funding expected to include federal dollars)
- Analyze range of alternatives based on:
 - Benefits – Performance against Purpose and Need
 - Impacts – human and natural environment
 - Costs – overall costs for design, right-of-way and construction
- Public involvement
- Agency coordination – local, state and federal

MID-STATES
CORRIDOR

LOCHMUELLER
GROUP

Why a Tiered NEPA Study?

- Large, complex project
- Two-staged “tiered” approach
- Tier 1
 - “Big picture” evaluation
 - Identify a corridor/facility type
 - Identify Sections of Independent Utility (SIUs) for Tier 2 studies
- Tier 2
 - Separate, detailed evaluation of each SIU
 - Identify specific alignment and right-of-way requirements within corridor for each SIU

**MID-STATES
CORRIDOR**

Project Milestones and Schedule

Milestone 1 - Preliminary Alternatives, Purpose & Need – Fall 2019

- Project goals (Purpose and Need)
- Potential route concepts (preliminary alternatives)

Milestone 2 - Screening of Alternatives – Early 2020

- High-level analysis of route concept
- Screen by Purpose and Need, cost, impacts

**MID-STATES
CORRIDOR**

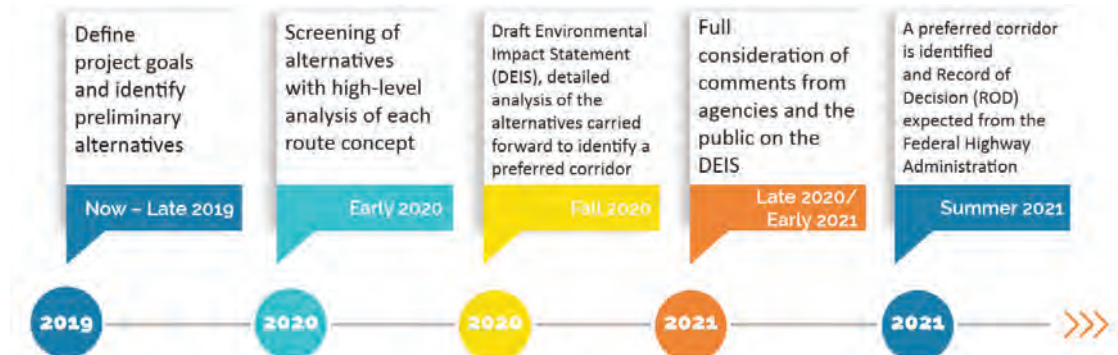

Milestone 3 - Draft Environmental Impact Statement (EIS) – Fall 2020

- Detailed analysis of alternatives
- Single preferred alternative
- Corridor and facility type

Milestone 4 - Final EIS & Record of Decision (ROD) – Summer 2021

- Address public and agency comments
- Final approval of refined preferred alternative

**MID-STATES
CORRIDOR**

Purpose & Need

Provide an improved transportation link between the US 231/Natcher Bridge and I-69 which:

- Improves regional connectivity for businesses in Dubois County and southern Indiana;
- Improves regional traffic safety in southern Indiana;
- Supports economic development in southern Indiana; and
- Improves connections to major multi-modal locations from southern Indiana.

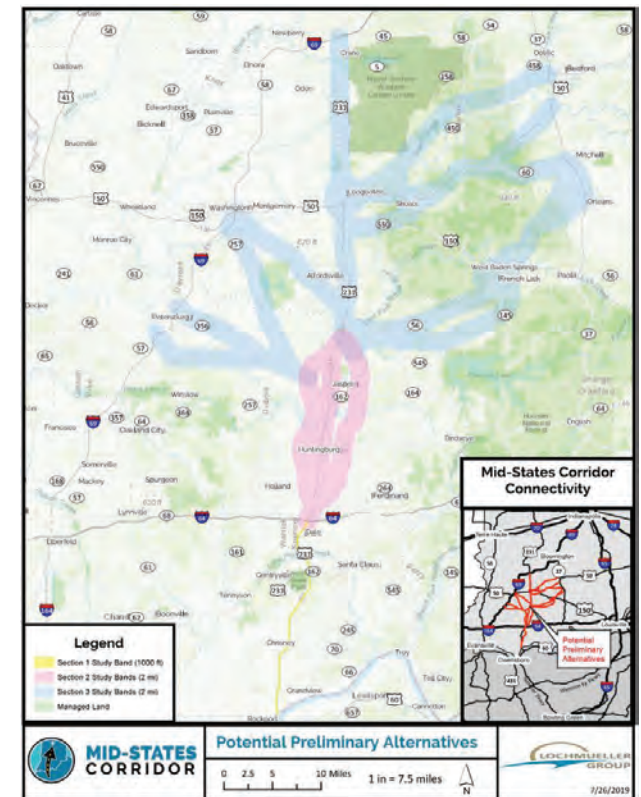

**MID-STATES
CORRIDOR**

Potential Preliminary Alternatives

- Narrow band along upgraded US 231 from Natcher Bridge to I-64
- 2-mile wide bands north of I-64
- Generally following existing highway facilities w/ some new terrain options

**MID-STATES
CORRIDOR**

Social, Economic and Environmental Impacts

Process:

- Avoid
- Minimize
- Mitigate

**MID-STATES
CORRIDOR**

**LOCHMUELLER
GROUP**

Environmental Considerations

Human Environment

- Residential and commercial relocations
- Residential distribution and neighborhood cohesion
- Infrastructure resources
- Cultural resources
- Air quality
- Noise
- Access
- Farms and agriculture
- Cemeteries
- Archaeological
- Water wells

MID-STATES
CORRIDOR

Environmental Considerations

Natural Environment

- Streams, wetlands, and water quality
- Endangered species
- Managed lands
- Geology
- Air quality
- Forested land
- Floodplains
- Indirect/cumulative impacts

**MID-STATES
CORRIDOR**

**LOCHMUELLER
GROUP**

Next Steps

- Public Information Meetings (PIMs) – Round #1
 - August 5th – Washington HS – 5:30 to 7:00
 - August 6th – Springs Valley HS – 5:30 to 7:00
 - August 8th – Jasper HS – 5:30 to 7:00
- Agency Coordination Meeting
 - August 20th
- Alternatives Screening Process
- 2nd Round of PIMs – early 2020

MID-STATES
CORRIDOR

LOCHMUELLER
GROUP

Public Involvement

- Engage Key Stakeholders
 - Regional Issues Involvement Teams (Southcentral, Northwest, Northcentral, Northeast)
 - *Ad Hoc* stakeholder meetings
 - Working alignment meetings
- Broader Public
 - Public Information Meetings – Two sets of meetings
 - Round 1: August 5, 6 and 8
 - Round 2: early 2020 (TBD)
 - Public hearings – fall 2020 (TBD)

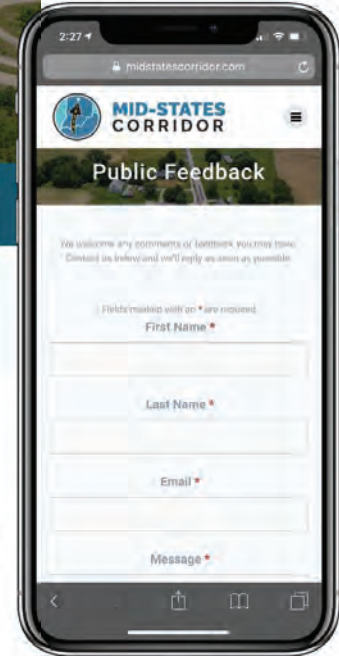

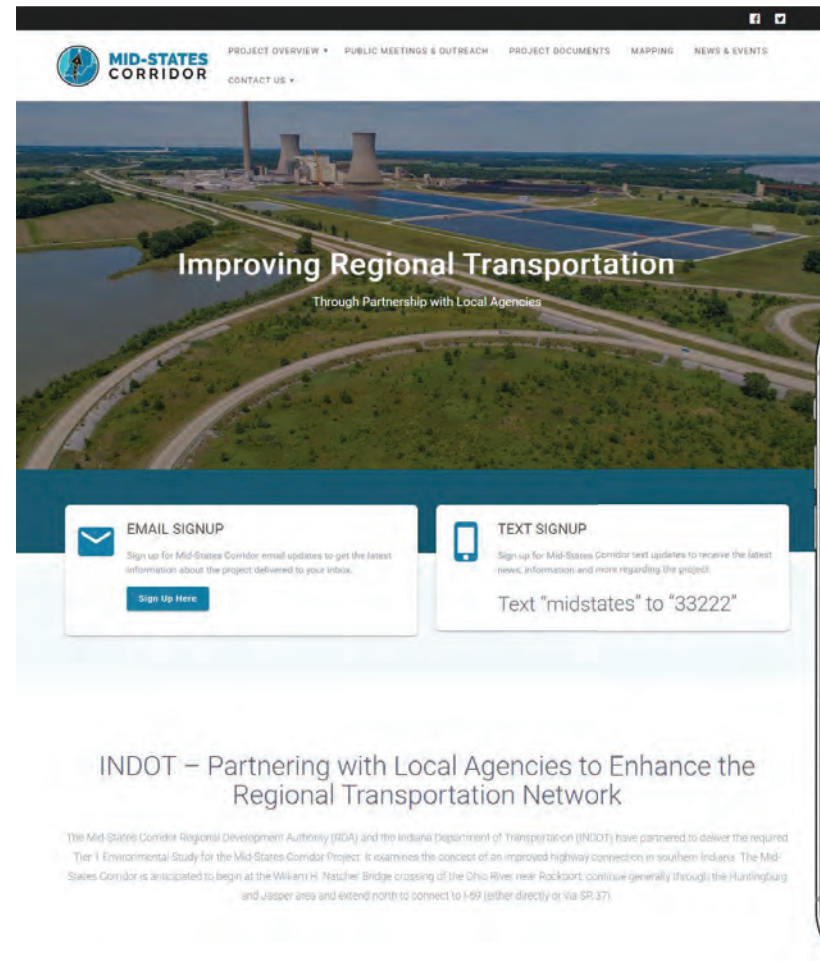

MID-STATES
CORRIDOR

Outreach Tools

- Project website (MidStatesCorridor.com)
 - Text and email alerts
 - Share feedback
 - Ask questions

**MID-STATES

Mid-States Corridor Project Survey

Name: _____

Full Address: _____

E-mail: _____

☐ Check to receive project updates by email.

Which one of the following best describes your interest in the Mid-States Corridor Project? (check one)

☐ I live in the area.

☐ I live elsewhere, but I travel in the area frequently.

☐ I travel in the area infrequently, but I'm interested in the project.

Do you own a business in the project area?

☐ Yes ☐ No

If yes, what is the business? _____

Proposed Purpose and Need

The proposed purpose and need for the Mid-States Corridor Project is to provide an improved transportation link between the US 231/Natcher Bridge and I-69 which:

- Improves regional connectivity for businesses in Dubois County and southern Indiana;
- Improves regional traffic safety in southern Indiana;
- Supports economic development in southern Indiana; and
- Improves connections to major multi-modal locations from southern Indiana.

Do you think there are other significant factors the Project Team should consider?

Potential Preliminary Alternatives

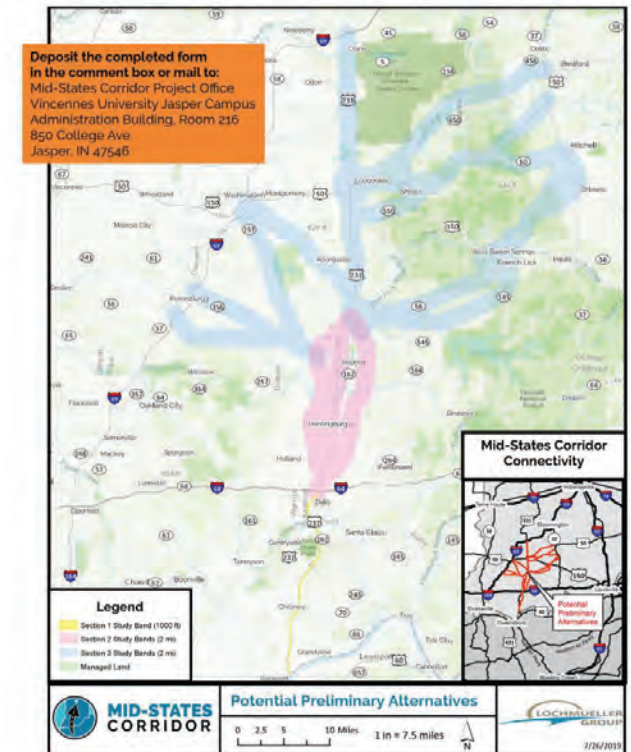

A broad range of potential preliminary alternatives is being considered by the Project Team.

What are your thoughts on the potential preliminary alternatives identified?

Several factors will be considered including benefits, impacts (to homes, businesses and natural resources) and costs of each corridor. When considering the Mid-States Corridor Project, what factors are important to you?

Potential Preliminary Alternatives

Use this map to mark your preferred path for the Mid-States Corridor. You may follow existing potential preliminary alternatives or draw a corridor you think the Project Team should consider.

Public Input Sought on Mid-States Corridor

Comment forms available at several area libraries

JASPER, Ind. (Aug. 26, 2019) – The Mid-States Corridor Project Team is making it easy for residents to find out more information about the project and share their opinions. Project handouts and comment forms are available at several public libraries in the area. Residents can pick up a handout, learn more about the project and leave their comments. Project Team members will pick up the completed sheets and consider all comments.

The handout and comment forms are the same ones shared at public meetings earlier this month. Meetings were held in Washington, French Lick and Jasper. More than 430 people attended the meetings and nearly 200 comment forms were completed.

The comment sheets include a map of potential preliminary alternatives and allow residents to mark their preferred path for the Mid-States Corridor or draw a corridor they think the Project Team should consider.

The Mid-States Corridor Project examines the concept of an improved highway connection in southern Indiana. It's anticipated to begin at SR 66 near the William H. Natcher Bridge crossing the Ohio River at Rockport, continue generally through Huntingburg and Jasper and extend north to connect to Interstate 69.

The project materials are available at 17 area libraries. The list of libraries and addresses can be found on the project website, MidStatesCorridor.com. Materials will be available through Sept. 20.

Project Overview

The Mid-States Corridor Regional Development Authority (RDA) and the Indiana Department of Transportation (INDOT) have started a Tier 1 Environmental Impact Statement (EIS), which is required by the National Environmental Policy Act (NEPA) for major construction projects that will include federal funding.

The Tier 1 EIS is expected to take just over two years to complete with a Record of Decision (ROD) expected in summer 2021. The ROD is the Federal Highway Administration's final approval of the preferred corridor.

After a Tier 1 ROD, a more detailed Tier 2 environmental study will determine specific alignments and preferred alternatives within the selected Tier 1 corridor.

###

The Mid-States Corridor Project examines the concept of an improved highway connection in southern Indiana. The Mid-States Corridor Regional Development Authority and the Indiana Department of Transportation are conducting the required Tier 1 Environmental Study for the project to determine a preferred corridor. Find more information at www.midstatescorridor.com.

MID-STATES CORRIDOR

The Mid-States Corridor Project examines the concept of an improved highway connection in southern Indiana. The Mid-States Corridor is anticipated to begin at the William H. Natcher Bridge crossing of the Ohio River near Rockport, continue generally through the Huntingburg and Jasper area and extend north to connect to Interstate 69.

THE WORK UNDERWAY >>>

The Mid-States Corridor Regional Development Authority (RDA) and the Indiana Department of Transportation (INDOT) are completing the required Tier 1 Environmental Impact Statement (EIS) for the Mid-States Corridor Project. The study will determine a preferred corridor.

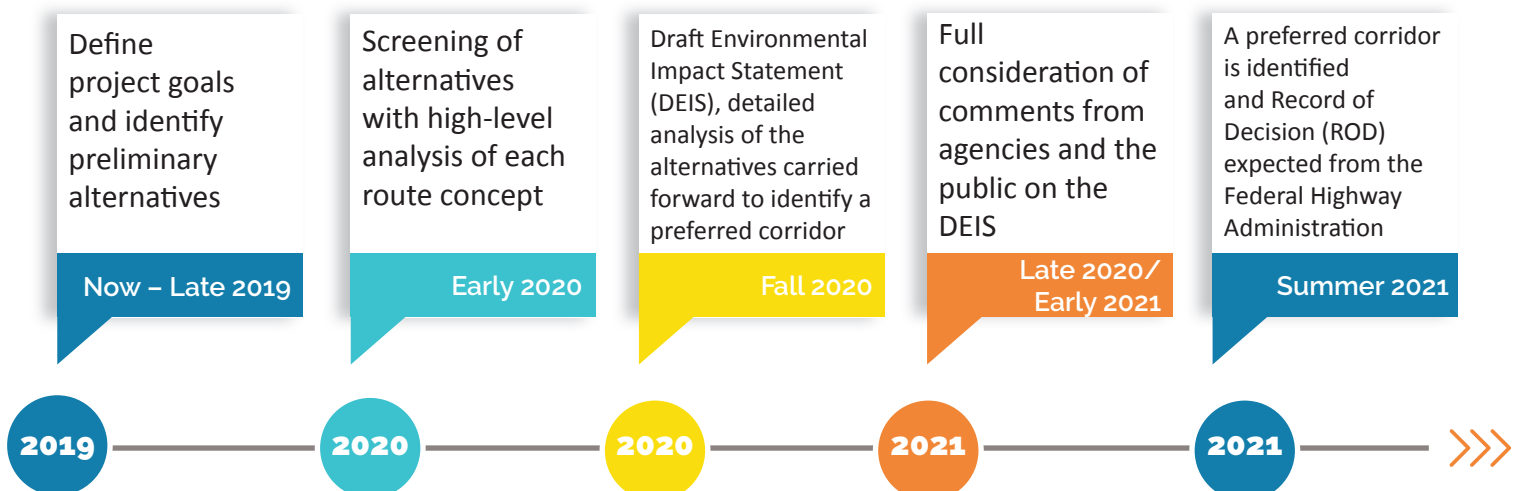

The study includes:

- Analysis and comparison of benefits, impacts and costs of a range of reasonable options to identify a preferred corridor for the proposed facility
- Assessment of the social, economic and environmental impacts of each corridor, along with consideration of ways to avoid, minimize or mitigate impacts
- Identification of the project's purpose and need, and consideration of a variety of options to meet both, including improvements to and use of existing facilities and construction of new roadway facilities
- Analysis of a no-build alternative to serve as a baseline for comparison
- Public involvement, including opportunities to participate and comment
- Coordination and consultation with local, state and federal agencies

TIMELINE

The Tier 1 EIS is expected to take just over two years to complete with a Record of Decision (ROD) expected in summer 2021. The ROD is the Federal Highway Administration's final approval of the preferred corridor.

After a Tier 1 ROD, more detailed Tier 2 studies will determine specific alignments and preferred alternatives within the selected Tier 1 corridor.

PURPOSE AND NEED

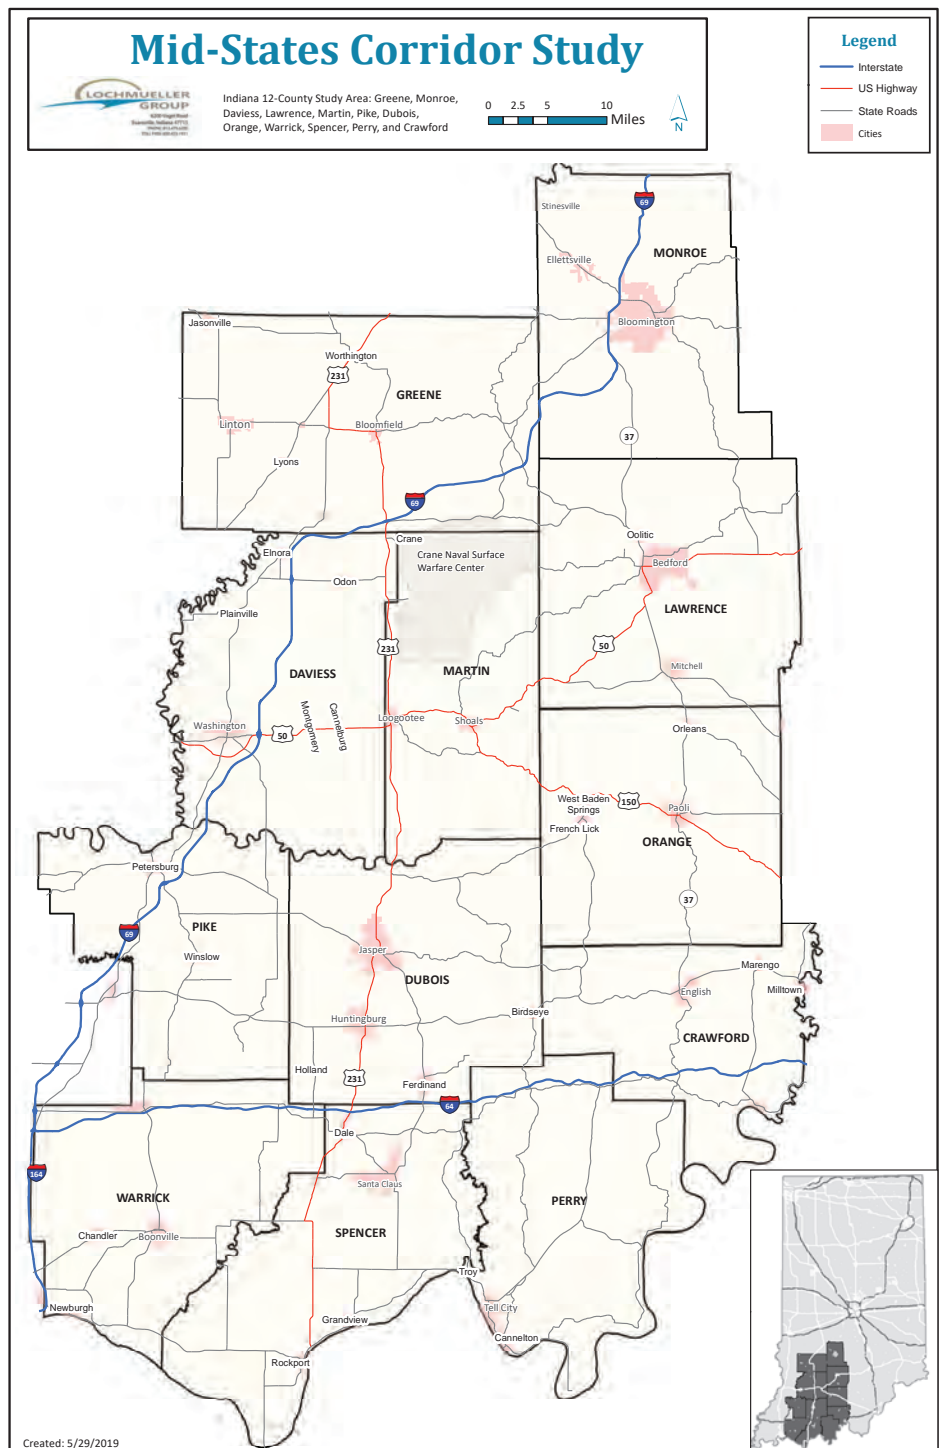

The proposed purpose and need for the Mid-States Corridor Project is to provide an improved transportation link between the US 231/Natcher Bridge and I-69 which:

- Improves regional connectivity for businesses in Dubois County and southern Indiana;
- Improves regional traffic safety in southern Indiana;
- Supports economic development in southern Indiana; and
- Improves connections to major multi-modal locations from southern Indiana.

STUDY AREA

The project study area is the region in which the project alternatives may be located. It also includes areas which may experience changes in traffic patterns from the project.

The study area includes Crawford, Daviess, Dubois, Greene, Lawrence, Martin, Monroe, Orange, Perry, Pike, Spencer and Warrick counties.

**MID-STATES
CORRIDOR**

THE PROJECT TEAM IS PREPARING AN ENVIRONMENTAL IMPACT STATEMENT (EIS)

What is an EIS? >>>

An Environmental Impact Statement (EIS) is required by the National Environmental Policy Act (NEPA) for major construction projects that will include federal funding.

The detailed document will include a description of the affected environment and analysis and comparison of the benefits, impacts and costs of a reasonable range of alternatives.

The EIS includes fact-based analyses that will support informed decision-making on corridor-wide issues.

EIS Considerations

Benefits

Performance against
Purpose and Need

Impacts

Human and natural
environment

Costs

Overall costs for
design, right-of-way
and construction

FOLLOW OUR PROGRESS

Meaningful public involvement is a key part of the environmental study process, and there are many ways for members of the public to stay informed and share their opinions. Public meetings will be held at key project milestones and public hearings will follow publication of the Draft Environmental Impact Statement (DEIS), along with a formal comment period.

☐ Check to receive project updates by email.

Which one of the following best describes your interest in the Mid-States Corridor Project? (check one)
(The project area can be found on the handout provided.)

☐ I live in the area.

☐ I live elsewhere, but I travel in the area frequently.

☐ I travel in the area infrequently, but I'm interested in the project.

Do you own a business in the project area?

☐ Yes ☐ No

If yes, what is the business?

Proposed Purpose and Need

The proposed purpose and need for the Mid-States Corridor Project is to provide an improved transportation link between the US 231/Natcher Bridge and I-69 which:

- Improves regional connectivity for businesses in Dubois County and southern Indiana;
- Improves regional traffic safety in southern Indiana;
- Supports economic development in southern Indiana; and
- Improves connections to major multi-modal locations from southern Indiana.

Do you think there are other significant factors the Project Team should consider?

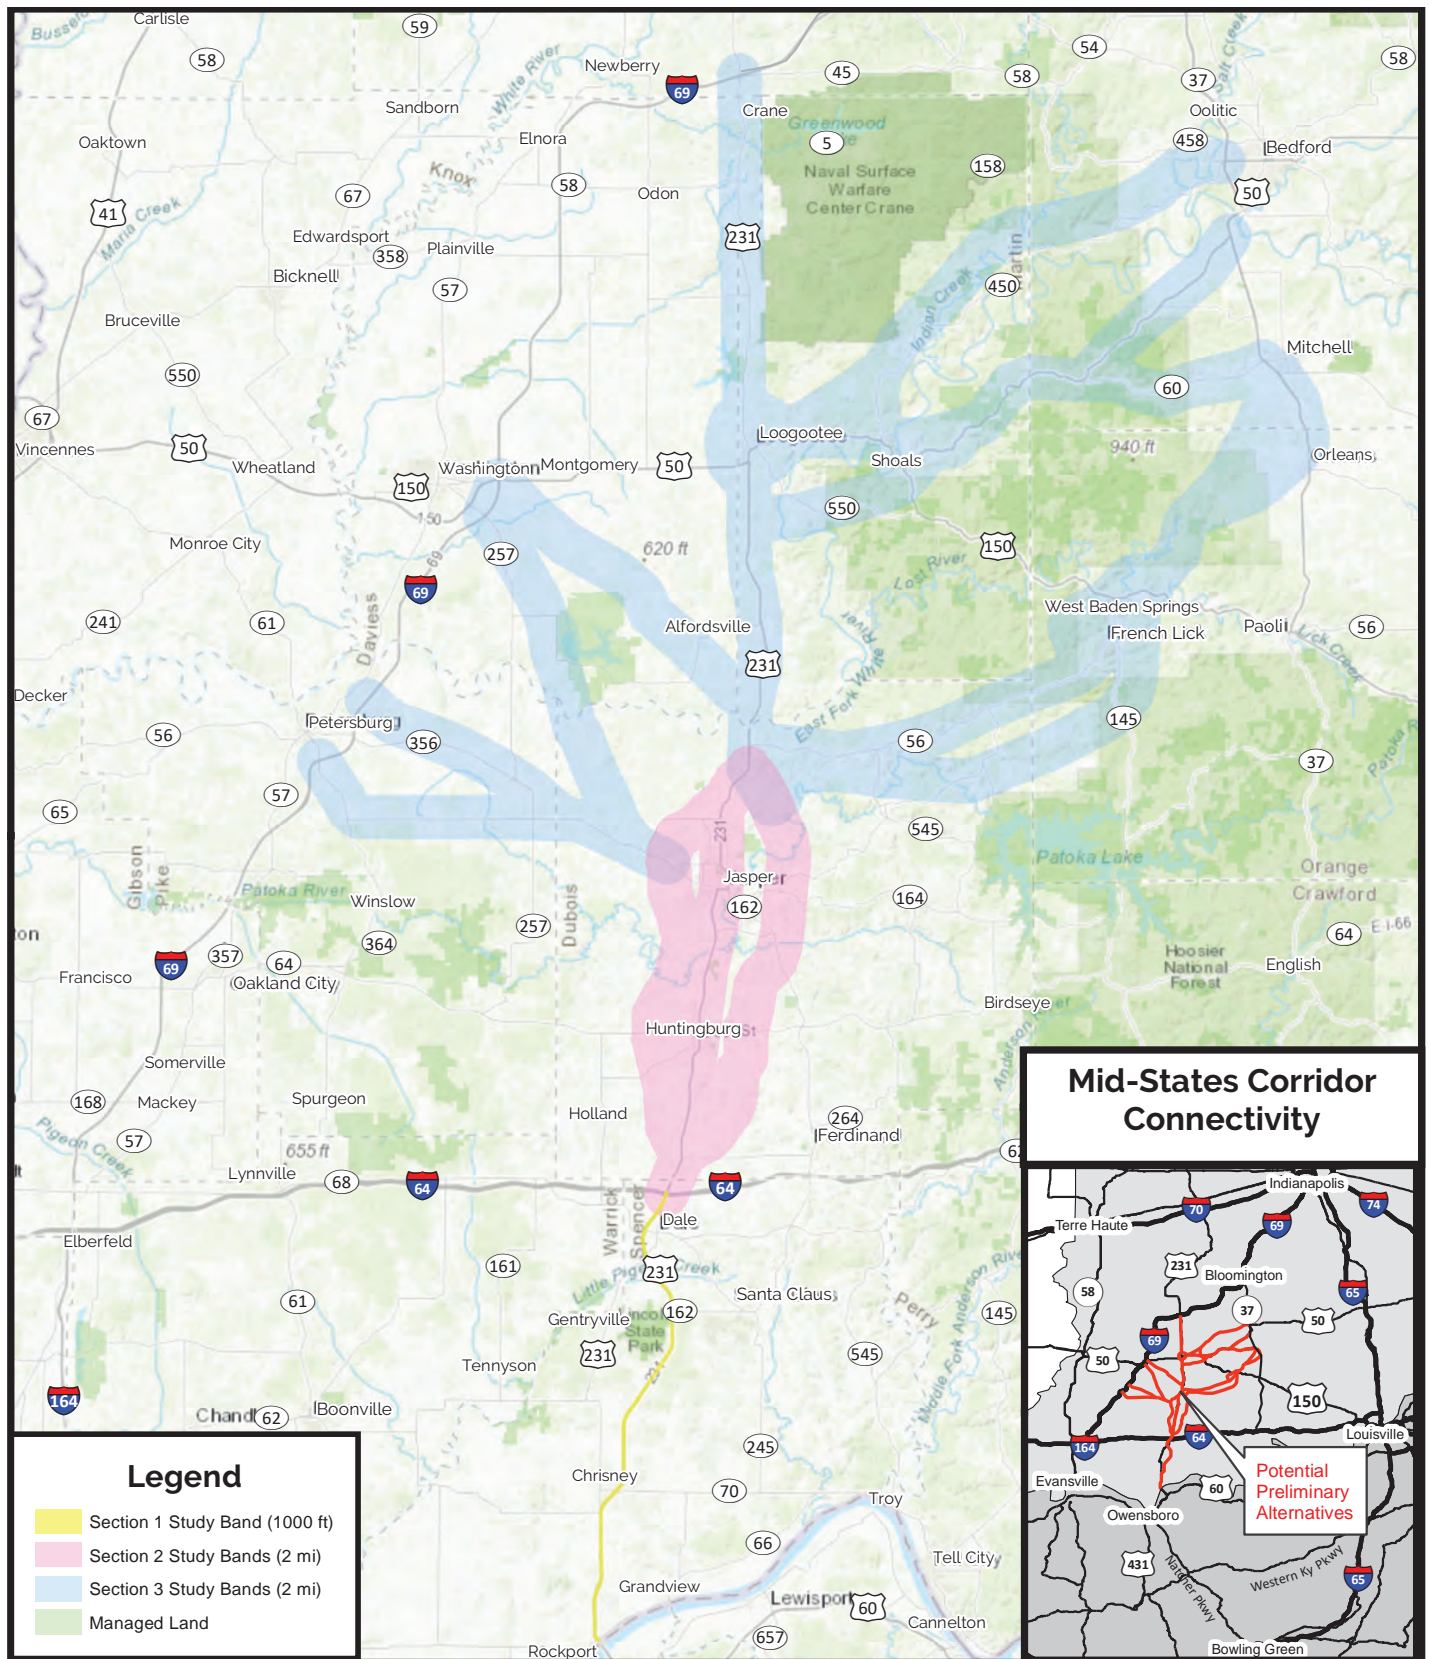

Potential Preliminary Alternatives

A broad range of potential preliminary alternatives (map on back) is being considered by the Project Team. What are your thoughts on the potential preliminary alternatives identified?

Several factors will be considered including benefits, impacts (to homes, businesses and natural resources) and costs of each corridor. When considering the Mid-States Corridor Project, what factors are important to you?

Potential Preliminary Alternatives

Use this map to mark your preferred path for the Mid-States Corridor. You may follow existing potential preliminary alternatives or draw a corridor you think the Project Team should consider. Deposit the completed form in the comment box provided.

MID-STATES CORRIDOR

Date of Meeting: February 18, 2020
Re: Mid-States Corridor Public Information Meeting Screening of Alternatives -- Loogootee, IN

Location: Loogootee High School – Loogootee, IN
Issue Date: March 6, 2020

Submitted By: Lochmueller Group

In Attendance: There were approximately 500 attendees from the public in attendance. Additionally, approximately 20 representatives from the project team and/or INDOT/FHWA were in attendance.

Key Themes of public input—these themes represent reoccurring sentiments from conversations with the project team and comment forms received at Loogootee, IN.

1. Improving regional connectivity through a more direct route to promote economic development in the Loogootee/Martin County area is a significant need.
2. Environmental impacts, particularly to the Hoosier National Forest to the east and other natural resources are a significant issue.
3. Concerns with impacts to the people, property and way of life in the Loogootee area.
4. The project should use existing infrastructure where possible, and minimize new terrain construction.
5. Amish community could be significantly impacted and the farming community as well.

A full meeting agenda and summary for all three public kick-off meetings can be found on the subsequent pages, following the location specific information.

Date of Meeting: February 19, 2020 **Re:** Mid-States Corridor Public Information Meeting Screening of Alternatives – Bedford, IN

Location: Bedford Middle School – Bedford, IN **Issue Date:** March 6, 2020

Submitted By: Lochmueller Group

In Attendance: There were approximately 150 attendees from the public in attendance. Additionally, approximately 15 representatives from the project team and/or INDOT/FHWA were in attendance.

Key Themes of public input—these themes represent reoccurring sentiments from conversations with the project team and comment forms received at Bedford, IN.

1. Missed the opportunity to fully capitalize on I-69... don't want to miss this opportunity
2. Environmental impacts, particularly those which affect the region's karst topography (water quality), and Hoosier National Forest should be minimized or avoided.
3. Route M has extremely challenging terrain and multiple concerns expressed about impacts to the limited access that already exists, and even additional flooding concerns.
4. Potential impacts to private property (including homes, and farms, especially with route M) are important.
5. Will additional traffic on this facility cause safety and congestion issues on SR 37/US 231.

A full meeting agenda and summary for all three public kick-off meetings can be found on the subsequent pages, following the location specific information.

Date of Meeting:	February 20, 2020	Re:	Mid-States Corridor Public Information Meeting Screening of Alternatives – Jasper, IN
-------------------------	-------------------	------------	---

Location:	Jasper Middle School – Jasper, IN	Issue Date:	March 6, 2020
------------------	-----------------------------------	--------------------	---------------

Submitted By: Lochmueller Group

In Attendance: There were approximately 600 attendees from the public in attendance. Additionally, approximately 20 representatives from the project team and/or INDOT/FHWA were in attendance.

Key Themes of public input—these themes represent reoccurring sentiments from conversations with the project team and comment forms received at Jasper, IN.

1. Impacts to private property, particularly farms and residential areas, are important.
2. Concerns that new roadway will adversely impact the counties biggest growth area around Ireland.
3. Upgrades to existing state highways that will be used for access to a new facility will be needed.
4. Concerns with impacts to business if you bypass Huntingburg and Jasper.
5. Improving regional connectivity is vital for continued economic development and improved quality of life in Huntingburg, Jasper and Dubois County.
6. Spend money to fix existing facilities rather than build a new facility.

A full meeting agenda and summary for all three public kick-off meetings can be found on the following pages.

Public Meeting Agenda

ITEMS DISCUSSED:

The meetings were an open house format lasting from 5:30 – 7:00 pm Eastern Time. A brief project presentation was given at 6:00 pm (approximately 30 minutes). Before and after the presentation, the project team was available for questions at informational stations.

The meetings provided an overview of the Mid-States Corridor project, outcomes from the screening of alternatives effort, and next steps. The presentation included a description of the screening process including factors considered, facility types and the preliminary alternatives moving forward for more detailed study. A questionnaire (online and hard copies) was available to gather feedback from attendees (March 23rd deadline).

Project Stations

After attendees signed in at a welcome table and provided contact information for future outreach, they were encouraged to visit the stations to learn more about the project.

Public Involvement Station

At the public involvement station, attendees were given an informational handout with project details, a timeline, information about the screening process and a map of the alternatives carried forward for detailed studies. The handout also included contact information to encourage attendees to follow the project progress through the website or social media outlets. In addition to a take-home handout, the attendees were given a questionnaire and encouraged to complete the form on-line (QR Code was provided on forms and at the meeting), which included an opportunity to provide a route preference, additional input on potential impacts along with general comments.

Project Overview Station

The project overview station included posters with the 12-county study area map and a brief explanation of the Mid-States Corridor. The project representatives answered general project questions.

Screening Process Station

The screening process station included graphics to help explain the screening process. The project representatives answered questions relating to the process including the alternatives family approach as well as other general project questions.

Facility Type Station

The facility type station included a poster with a brief description and images of the three facility types under consideration: Super-2, Expressway, and Freeway. The project representative answered questions about the types of facilities considered and what factors drive that decision.

Alternatives Moving Forward (Mapping) Station

The alternatives moving forward station contained mapping of each of the five routes (ten alternatives) carried forward for detailed studies. Knowing this station would draw the most attention, multiple project representatives manned two sets of six maps showing the routes. Questions at this station covered a range of interests and concerns, mostly focused on potentially impacted properties or proximity of routes to people's homes/properties. They also explained the process that narrowed the number of potential routes down to where they are today, what the 2,000' corridor lines meant, and where the process goes from here. The Tier 1 process determines the route and facility type or No Build. If a build decision is identified, the selected alternative corridor will then advance to subsequent Tier 2 studies, where specific alignments will be determined.

Next Steps Station

The next steps station included a graphic of the remaining project milestones. The project representative explained the 'next steps' of the Tier 1 process, what takes place after this phase of the project process, and fielded general project questions.

Presentation

Project Manager, Jason DuPont (Lochmueller Group), began the presentation with introductions of the project team, including Kyanna Moon (INDOT), Michelle Allen (Federal Highway), Mark Schroeder (Regional Development Authority), and David Goffinet (Lochmueller, Public Involvement). The presentation included:

- Project Milestone Schedule – Where are we? - four project milestones: potential alternatives and Purpose & Need, Screening of Alternatives, Draft Environmental Impact Statement (EIS), and Final EIS/Record of Decision
- Preliminary Alternatives – How did we get from dozens to 10 routes and 28 alternatives?
- Alternatives Families Approach – three geographic families of alternatives, screen by families based on costs, benefits, and impacts

April 3, 2020

Page 6

- Northwest, North Central, Northeast families - show each alternative considered within each family
- Three Facility Types – show examples of Super-2, expressway and freeway
- Screening Process – performance in meeting purpose and need, potential impacts to human and natural environment, and comparative costs
- Alternatives Carried Forward for Detailed Study – by family describe which alternatives carried forward and why, also explain why alternatives were NOT carried forward

David Goffinet, Public Involvement Manager (Lochmueller Group), explained the next steps of the process and the importance of public involvement throughout, including:

- The next steps for public and agency involvement, including future public meeting dates
 - Agency Coordination meeting and tour
 - Public hearings: Fall 2020
- The variety of groups involved and subsequent meetings, involving: Regional Issues Involvement Teams, *Ad Hoc* stakeholder meetings, working alignment meetings, and the broader public.
- Outreach Tools – The various ways the public can provide feedback, comments, or questions, including: the project website, the local project office on Vincennes University Jasper Campus Administration Building, the comment sheets provided, and various project social media outlets.
- Encourage people to complete project questionnaires.

The project team remained at the venue after the presentation to answer questions.

Mid-States Corridor Public Meetings

The Mid-States Corridor Project examines the concept of an improved highway connection in southern Indiana.

It would begin at SR 66 near the Natcher Bridge crossing the Ohio River at Rockport, continue generally through the Huntingburg and Jasper area and extend north to connect to Interstate 69.

Development Authority
- David Goffinet – Public Involvement

MID-STATES
CORRIDOR

- Tier 1 Environmental Impact Statement
- Evaluate improved highway connection (multiple facility types)
- Evaluate multiple corridors
 - Natcher Bridge to I-69 (multiple corridors west directly to I-69 and east to I-69 via SR 37)
- Twelve county study area

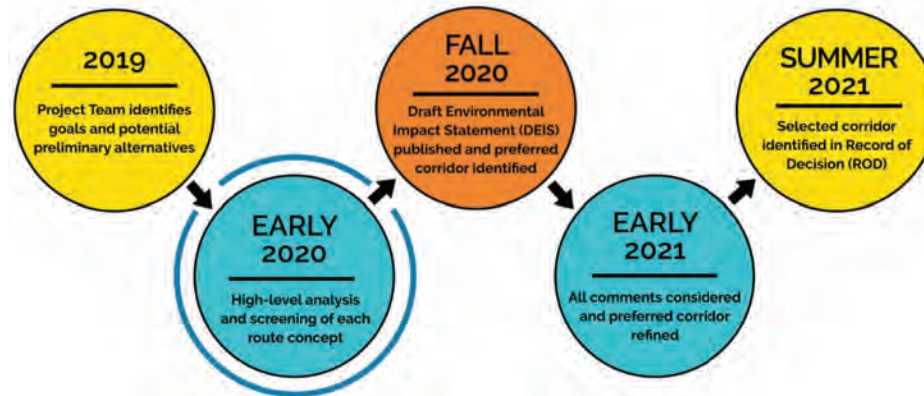

Project Milestones and Schedule

Milestone 1 - Purpose & Need, Preliminary Alternatives – Fall 2019

Milestone 2 - Screening of Alternatives – We are here

Milestone 3 - Draft Environmental Impact Statement (EIS) – Fall 2020

Milestone 4 - Final EIS & Record of Decision (ROD) – Summer 2021

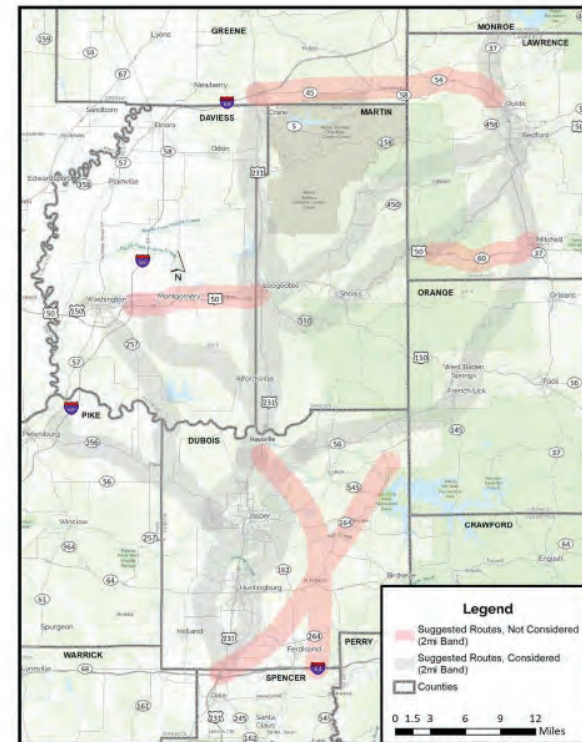

**MID-STATES
CORRIDOR**

Potential Preliminary Alternatives

- Dozens Considered
- Developed From
 - Previous Studies
 - Regional Issues Involvement Teams (RIITs)
 - Agency Feedback
 - Public Input

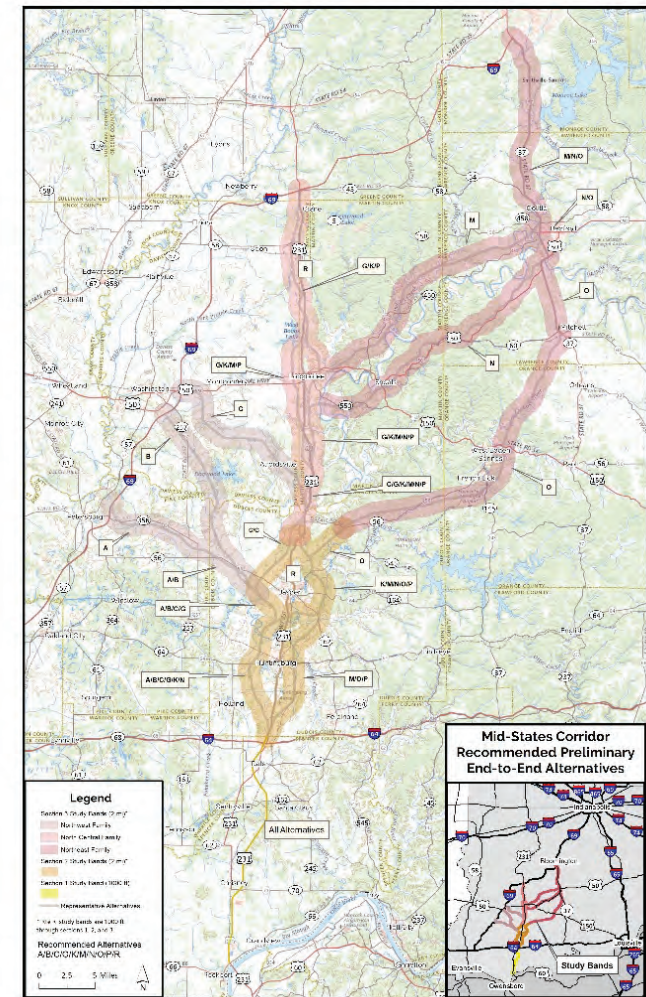

**MID-STATES
CORRIDOR**

**LOCHMUELLER
GROUP**

Preliminary Alternatives

- High-level screening
- Meet project Purpose & Need?
- 10 routes
- 28 alternatives (combination of routes and facility types)

**MID-STATES
CORRIDOR**

**LOCHMUELLER
GROUP**

Alternative Families Screening Approach

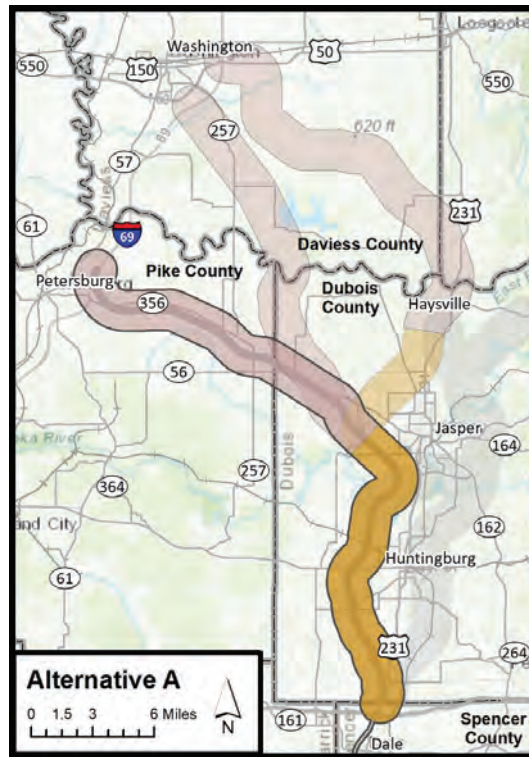

- Three geographic families
 - Northwest
 - North Central
 - Northeast
- Only compare alternatives within same family
 - Benefits (performance), Impacts and Cost

MID-STATES
CORRIDOR

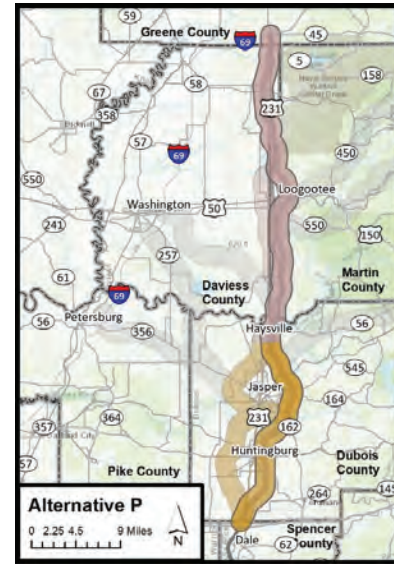

Northwest Family

**MID-STATES
CORRIDOR**

**LOCHMUELLER
GROUP**

North Central Family

**MID-STATES
CORRIDOR**

**LOCHMUELLER
GROUP**

Northeast Family

**MID-STATES
CORRIDOR**

**LOCHMUELLER
GROUP**

Facility Types

Freeway

- At least two lanes in each direction of travel
- Access provided only at interchanges

Interstate 69 in Gibson County

MID-STATES
CORRIDOR

Facility Types

Expressway

- At least two lanes in each direction of travel
- Access provided by combination of interchanges and at-grade intersections with state and local roads

US 231 in Spencer County

MID-STATES
CORRIDOR

LOCHMUELLER
GROUP

Facility Types

Super-2

- One travel lane in each direction
- Passing/auxiliary lane the length of the alternative
- Could use as one direction of a future freeway or expressway

SR 145 in Crawford County

MID-STATES
CORRIDOR

Purpose & Need Assessment

- Performance against P&N (benefits)
- Provide an improved transportation link between the US 231/Natcher Bridge and I-69 which:
 - Improves regional connectivity for businesses in Dubois County and southern Indiana;
 - Improves regional traffic safety in southern Indiana;
 - Supports economic development in southern Indiana; and
 - Improves connections to major multi-modal locations from southern Indiana.

**MID-STATES
CORRIDOR**

Impact Assessment

Impacts to both natural resources and the community considered

- Natural environmental impacts
- Residential impacts
- Business impacts
- Managed lands impacts
- Cultural resources impacts

**MID-STATES
CORRIDOR**

**LOCHMUELLER
GROUP**

Comparative Cost Assessment

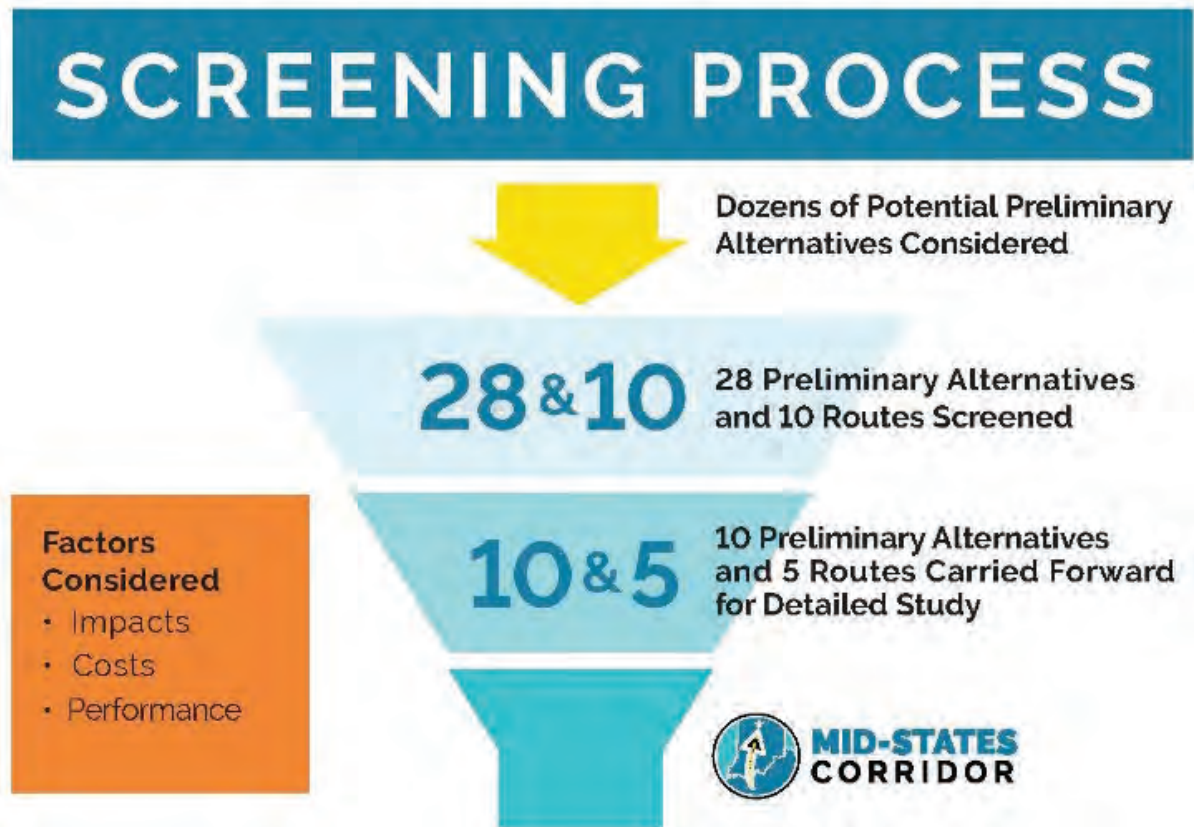

- **Preliminary Construction** costs only
- Generalized on a per mile basis
- Based on terrain, location and facility type
- Used known costs from similar constructed facilities

MID-STATES
CORRIDOR

LOCHMUELLER
GROUP

Screening of Alternatives Process

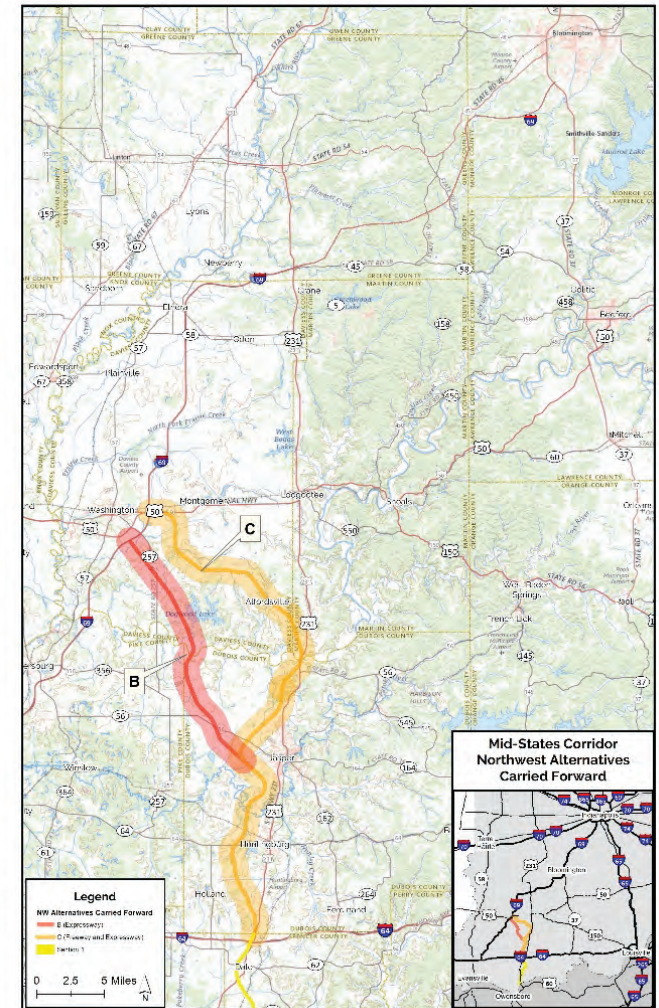

**MID-STATES
CORRIDOR**

**LOCHMUELLER
GROUP**

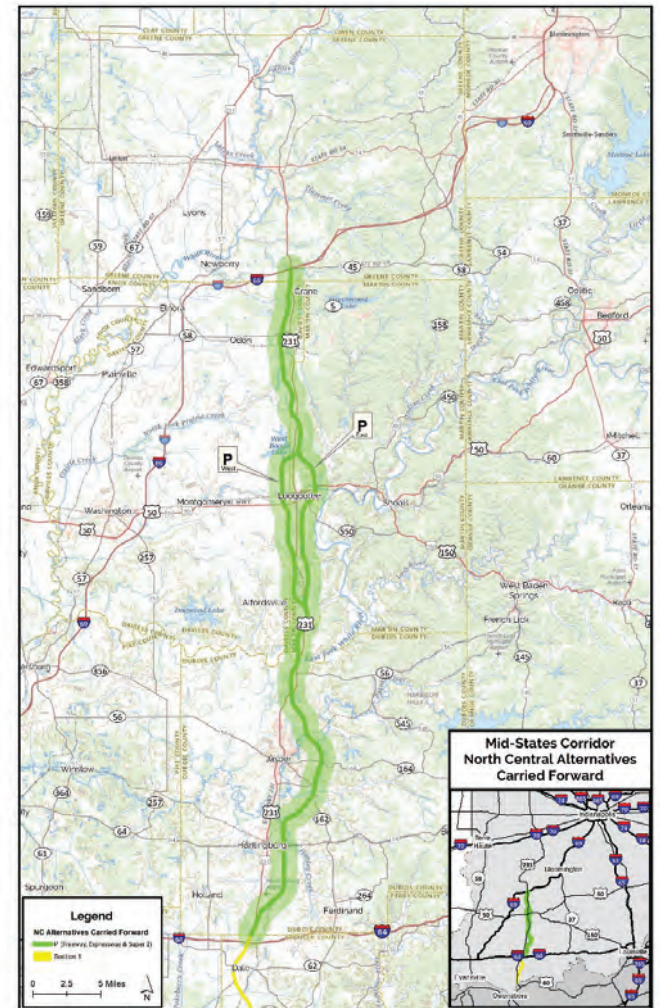

Northwest Alternatives Carried Forward

- **Alt. B (expressway only) carried forward**
- **Alt. C (freeway and expressway) carried forward**
- All super-2 facility types discarded
 - Underperform against expressways
 - Similar cost to expressways
- Alt. A (all facility types) discarded
 - Similar in cost and impacts to Alts. B & C
 - Attract significantly less traffic than Alts. B & C
 - Only performance advantage – truck VHT savings
- Alt. B (freeway) discarded
 - Lower performance on project goals than Alt. C

North Central Alternatives Carried Forward

- **Alt. P (all 3 facility types) carried forward**
- **Incremental trade-offs in performance, cost and impacts; suggests more detailed analysis of each facility type**
- **Alt. R (Super-2) discarded**
 - Freeway and expressway not considered due to excessive impacts in urban areas
 - Much poorer performance than all other alternatives
 - Much higher community resource impacts
 - Much higher cost than other super-2 facilities

**MID-STATES
CORRIDOR**

North Central Alternatives Carried Forward

- Alt. K (all facility types) discarded
 - Lack of performance advantage over other alternatives
 - Much higher wetlands impact
- Alt. G (all facility types) discarded
 - Poor performance on project goals compared to Alt. P
 - Comparable resource impacts to Alt. P

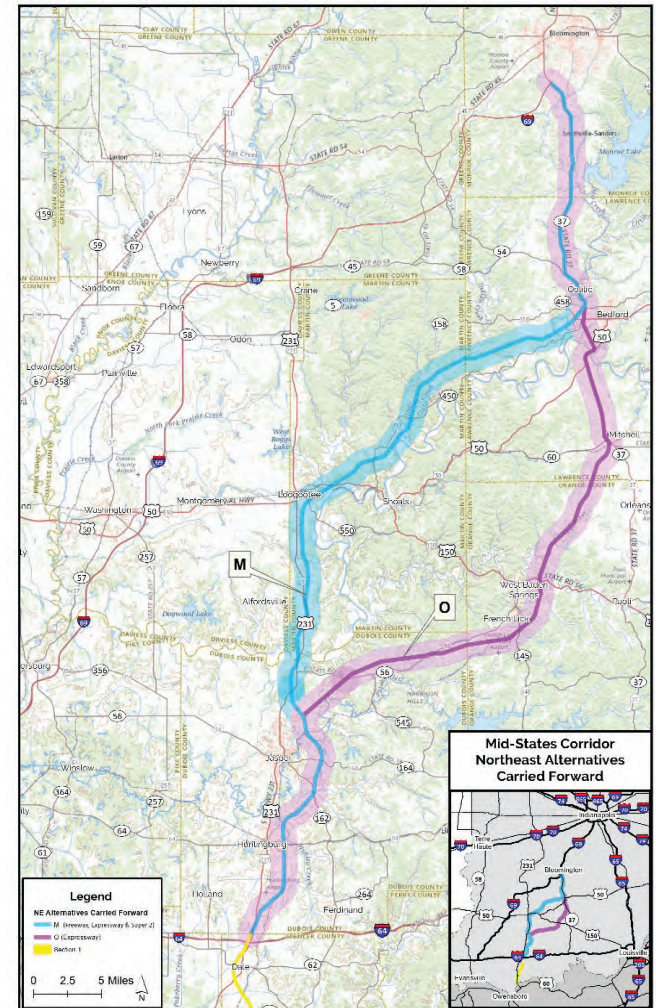

**MID-STATES
CORRIDOR**

Northeast Alternatives Carried Forward

- Alt. M (all 3 facility types) carried forward
- Alt. O (expressway only) carried forward
- Alt. N (all facility types) discarded
 - Highest level of impacts, especially natural resources
 - Performs lower on meeting goals than Alts. M and O
 - No cost advantage over Alts. M and O
- Alt. O (super 2 and freeway) discarded
 - Lower level of performance than Alt. M
 - Attracts lower level of traffic than Alt. M
 - Higher level of karst impacts (key resource in region) than Alt. M

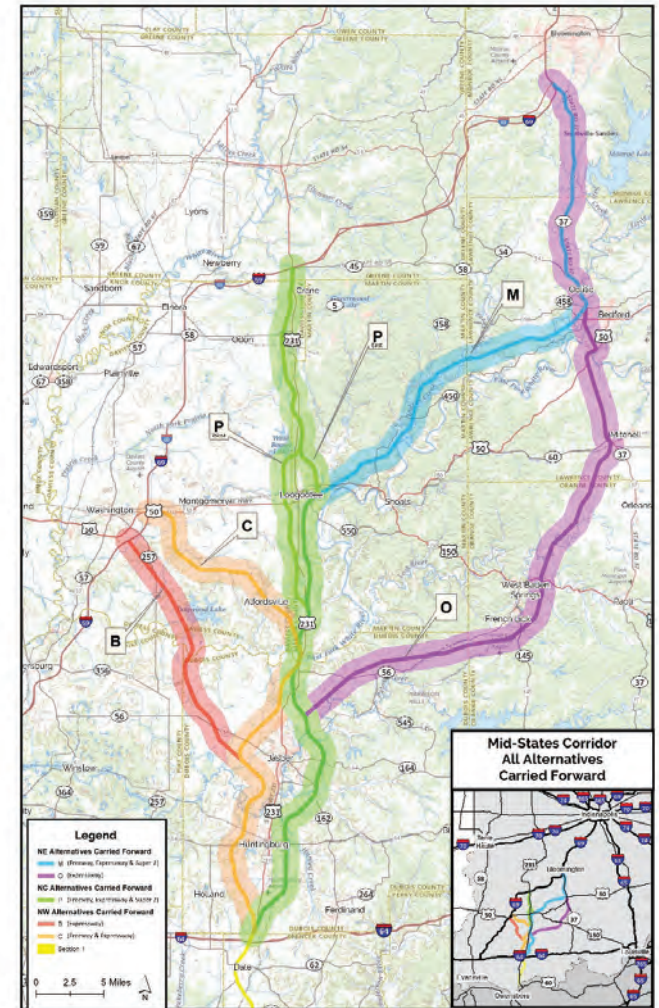

**MID-STATES
CORRIDOR**

Summary of Preliminary Alternatives Carried Forward

- Alt. B (expressway only)
- Alt. C (freeway and expressway)
- Alt. M (super-2, expressway and freeway)
- Alt. O (expressway only)
- Alt. P (super-2, expressway and freeway)

**MID-STATES
CORRIDOR**

Next Steps

- Public Information Meetings (PIMs) – Round #2
 - February 18th : Loogootee HS
 - February 19th : Bedford Middle School
 - February 20th : Jasper Middle School
 - 5:30 to 7:00 pm, open house format
 - 6pm presentation
- Agency Coordination Meeting
 - March 3rd and 4th, meeting and project tour

MID-STATES
CORRIDOR

Next Steps

- Engage Key Stakeholders
 - Regional Issues Involvement Teams (Southcentral, Northwest, Northcentral, Northeast), two additional rounds
 - Expert Land Use Panel meetings, April
 - *Ad Hoc* stakeholder meetings, as needed
 - Working alignment meetings, as needed
- General Public
 - Public hearings – fall 2020
 - Single Preferred Alternative Corridor

Comments

Screening Report Questionnaire

**MID-STATES
CORRIDOR**

Name: _____ Zip Code: _____

E-mail: _____ ☐ Check to receive project updates

Which one of the following best describes your interest in the Mid-States Corridor Project?
(Check all that apply)

☐ I live in the project study area. ☐ I live elsewhere, but I travel in the area frequently.

☐ I travel in the area infrequently, but I'm interested in the project. ☐ I work in the area.

Of the five routes moving forward for detailed study (B, C, M, O, P), please rank the routes in the order of your preference (1-5), with 1 being your top preference.

B

C

M

O

P

The core goals of the project include increased accessibility to major business markets, more efficient truck/freight travel to southern Indiana, reduced crashes in southern Indiana and increased access to major rail and air intermodal centers.

Please read the descriptions of the following facility types and answer the following questions:

- **Freeway:** A freeway includes at least two lanes in each direction of travel with access provided only at interchanges.
- **Expressway:** An expressway includes at least two lanes in each direction of travel with access provided by a combination of interchanges and at-grade intersections with state and local roads.
- **Super-2:** A Super-2 includes one travel lane in each direction, in addition to a passing/auxiliary lane the length of the alternative. The facility could be used as one direction of a future freeway or expressway.

Do you believe a freeway would meet the needs in the area?

☐ Yes ☐ No

Do you believe an expressway would meet the needs in the area?

☐ Yes ☐ No

Do you believe a Super-2 would meet the needs in the area?

☐ Yes ☐ No

Do you know of any natural or man-made features the Project Team should be aware of as it considers the alternatives moving forward for detailed study?

Tell Us What You Think

We want to hear from you

The Mid-States Corridor Project recently held a series of public meetings to review the Screening of Alternatives Report. Ten alternatives on five routes are moving forward for more detailed study. It's not too late to share your feedback!

Overview

The Mid-States Corridor Project examines the concept of an improved highway connection in southern Indiana. It would begin at SR 66 near the William H. Natcher Bridge crossing the Ohio River at Rockport, continue generally through Huntingburg and Jasper and extend north to connect to Interstate 69.

Share your opinions in a few easy steps

- ▶ Review the accompanying handout to learn more about the screening process and alternatives carried forward for more detailed study.
- ▶ Scan this QR code or go to MidStatesCorridor.com to complete an online questionnaire or complete the accompanying questionnaire.
- ▶ Simply complete the questionnaire online or leave your completed form in the provided comment box. Responses will be accepted through March 23. Thanks for sharing your feedback.

Follow our progress >>>

Meaningful public involvement is a key part of the environmental study process, and there are many ways for members of the public to stay informed and share input.

Mid-States Corridor Project Office

Vincennes University Jasper Campus
Administration Building, Room 216
850 College Ave. • Jasper, IN 47546

The project office is open Monday, Wednesday
and Friday from 8 a.m. to 5 p.m. ET, and by
appointment.

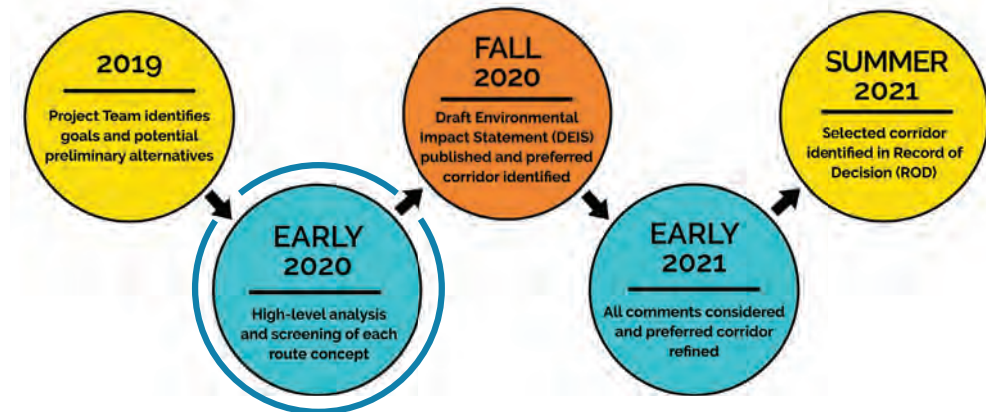

FACILITY TYPES >>>

Three facility types were considered for Mid-States preliminary alternatives: freeway, expressway and Super-2.

FREEWAY	EXPRESSWAY	SUPER-2
<ul style="list-style-type: none"> At least two lanes in each direction Access provided only at interchanges 	<ul style="list-style-type: none"> At least two lanes in each direction Access at interchanges and at-grade intersections 	<ul style="list-style-type: none"> One travel lane in each direction Passing/auxiliary lane and/or wider shoulders where appropriate

NEXT STEPS >>>

The Draft Environmental Impact Statement (DEIS) is expected to be published this fall and will identify a preferred corridor. A Record of Decision (ROD) is expected in summer 2021. After a Tier 1 ROD, more detailed Tier 2 environmental studies will determine specific alignments and preferred alternatives within the selected Tier 1 corridor.

MID-STATES CORRIDOR

The Mid-States Corridor Project examines the concept of an improved highway connection in southern Indiana. It would begin at SR 66 near the William H. Natcher Bridge crossing the Ohio River at Rockport, continue generally through the Huntingburg and Jasper area and extend north to connect to Interstate 69.

SCREENING PROCESS >>>

The Project Team started its work in summer 2019 with dozens of potential preliminary alternatives developed from a review of previous studies, agency feedback and public input. Alternatives that didn't satisfy the Purpose and Need of the project and/or having major impacts to key resources were discarded.

The Project Team screened 28 preliminary alternatives on 10 different routes, considering impacts, costs and performance. Ten alternatives on five different routes are advancing for more detailed study.

Factors Considered

- Impacts
- Costs
- Performance

IMPACTS to both natural resources and the community were considered including:

- Natural environmental impacts
- Residential impacts
- Business impacts
- Managed land impacts
- Cultural resource impacts

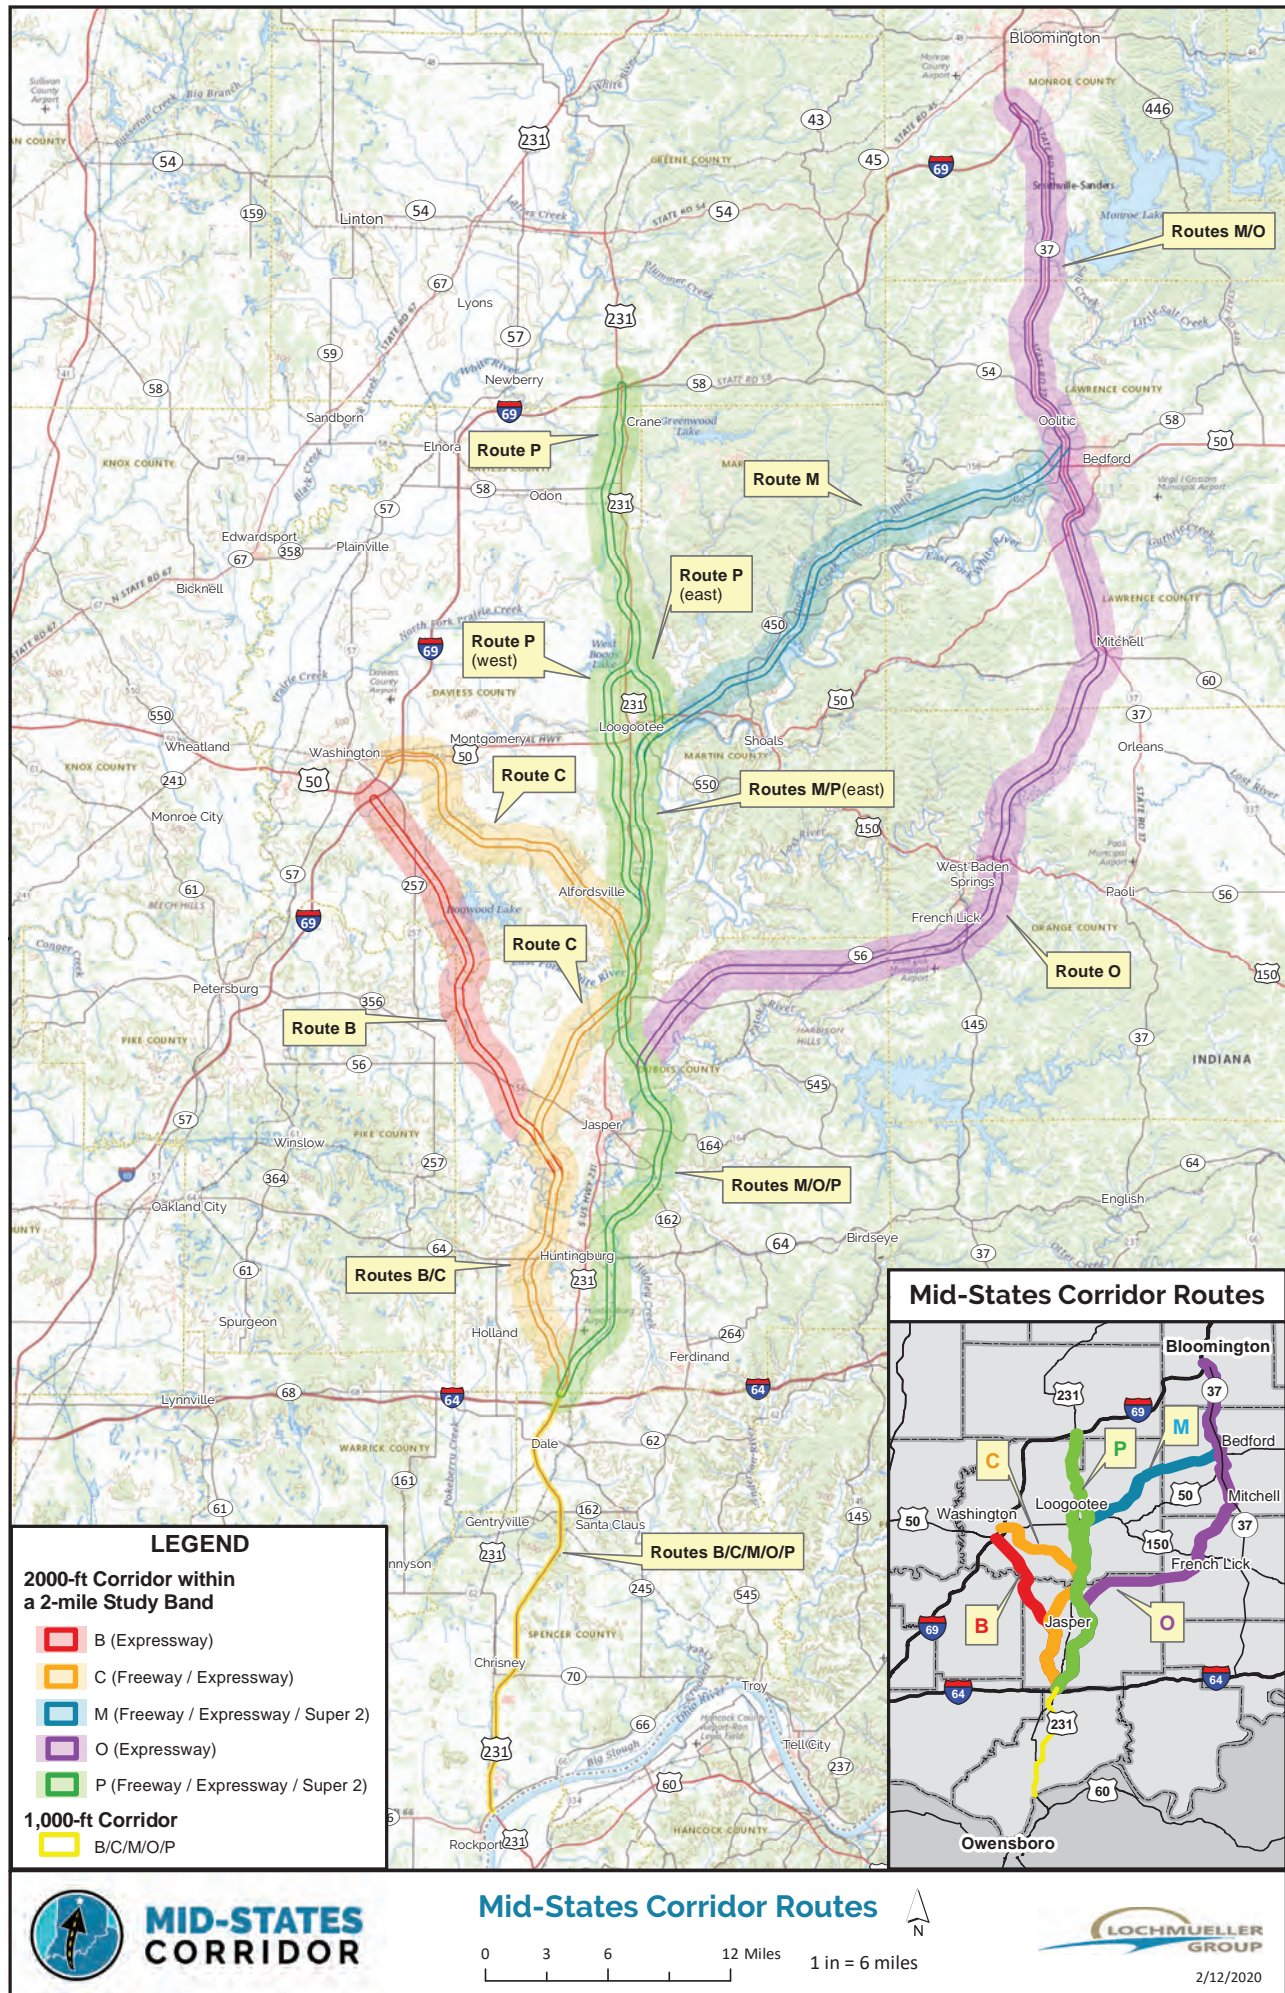

COSTS Comparative preliminary construction costs were determined for alternatives. Costs consider facility type and terrain.

PERFORMANCE of each preliminary alternative was evaluated against the core goals of the project, including:

- Increase accessibility to major business markets
- Provide more efficient truck/freight travel in Southern Indiana
- Reduce crashes in Southern Indiana
- Increase access to major rail and air intermodal centers

The full screening report is available at MidStatesCorridor.com
